12+ years of concrete success designing and executing construction designs with strong focus on successful completion of high-end commercial and residential construction projects and realization of highest quality levels.

CONSTRUCTION PROJECTS SPECIALIST

Quality-focused and safety-driven Civil Engineering professional leveraging project management skills along with proven analytical and organizational aptitude to optimize operational efficacy and improve workflow. Excellent multitasker with ability to ensure effective utilization of available resources across multiple tasks within projects/processes. Stellar track record of consistently accomplishing quality, safety, and regulatory standards with a knack for improving project bottom-line.

Demonstrated talent in identifying and fulfilling project requirements and specifications, mitigating potential risks, managing inventory and procurement, and finalizing pre-construction plans with impeccable attention to detail and accuracy. Proven ability to display exceptional performance within team-driven, complex, challenging, and fast-paced environments. Proficient in engaging major stakeholders and clients to share project performance and updates.

CORE COMPETENCIES

Project Management	Inventory Control	Cost Estimation
Quality Assurance & Control	System Administration	Regulatory Compliance
Strategic Negotiation	Productivity Improvement	Rapport Building
Resource Allocation	Performance Enhancement	Data Analysis
Budgeting & Reporting	Safety Implementation	Site Inspections

PROFESSIONAL EXPERIENCE

Founding Member / Board Director Gozineh | Location

Constructed standard, deviator, locator, and pier pre-cast through provision and assembling of 40 sets of hydraulic form works in four types. Performed detailed review of various documents, including method statements, kinematic drawings, and inspection of programs with maximum accuracy and dexterity. Delivered expert-level supervision for assembling, installation, launching, and erection of LGs. Deployed civil engineering methodologies and techniques to successfully elevate bridge with 6Km pre-cast pre-stressed concrete box girders supported as well as constructed by four sets of LG. Utilized span-by-span method to construct and erect bridge with parallel launching gantry infill practice. Managed project timelines, drafted and allocated budget, maintained construction sites, assured implementation of safety procedures, and evaluated construction reports.

- ✧ Maintained availability of crucial construction materials and heavy equipment parts to ensure continuation of construction work.
- ✧ Administered all technical aspects of construction projects for timely completion of constructions.

Piping Senior Engineer Rey Ab | Location

Developed top-quality wastewater treatment, water tanks, and water reservoir designs in line with specifications and requirements, as well as efficiently managed and implanted water piping systems. Operated water treatment plant and managed power generation for smooth plant operations. Designed and applied QA/QC standards to achieve desired outcomes. Coordinated with other project technicians for strict compliance with design specifications.

- ✧ Assured optimal quality level and maintained strict adherence with SLAs and regulatory standards.

Continued...

Job Title**Iran National Oil Company** | Location

Operated various oil drilling equipment, implemented on project instructions, and maintained efficiency of equipment. Ensured on-time completion of multiple large-scale oil, gas, and petrochemical projects, such as construction and installation of Oil & Gas pipelines. Supervised operations of oil drill piers for extraction and shipping of oil. Acquired and analyzed field data to track operational progress. Coordinated with other engineers and technicians to execute assigned tasks within set time limits.

- ✧ Detected and resolved any issues with the drilling equipment, as well as replaced any faulty tools/equipment and installed new parts in place of damaged parts.
- ✧ Implemented safety protocols to ensure maximum safety of on-site workers.

ADDITIONAL EXPERIENCE AS INFORMATION TECHNOLOGY PROFESSIONAL

During this tenure, architected, configured, installed, and integrated various complex software, frameworks, and systems for top-tier management of internal and external organizational processes, while ensuring seamless operational activities and improving procedure execution time through delivery of robust technical solutions.

- ✧ **Senior Manager / Application Developer**, Bank of Montreal, Toronto, Ontario, Canada
- ✧ **Enterprise Application Delivery Consultant**, IBM Canada, Markham, Ontario, Canada
- ✧ **System Analyst**, TD Bank
- ✧ **Senior Quality Assurance Analyst**, Canadian Bank
- ✧ **Enterprise Application Developer, Government Institution**, Toronto

TECHNICAL PROFICIENCIES

- ✧ **Core:** Packaged Solution Services Design, Enterprise Development & Integration
- ✧ **Framework:** SOA, J2EE, Eclipse, Struts, Curam
- ✧ **Methodologies:** UML, IRUP, IBM GS Method, AUP
- ✧ **Operating Systems:** Unix, AIX, Linux, Windows
- ✧ **Languages:** Java, Perl, Visual basic, XML
- ✧ **Databases:** Netezza, Sybase, Oracle, DB2
- ✧ **Development Tools:** Rational Software Architect, RAD
- ✧ **Test Methodologies:** Boundary Value Analysis, Equivalency Class Partitioning

EDUCATION & CREDENTIALS

B.S. in Civil Engineering

Shiraz University, Iran

B.S. in Computer Science

Seneca College, Canada
